STEREO EARBUDS

Groove

Floyd

Elton

Hybrid ANC -45dB

i Hybrid ANC (Hybrid Active Noise Cancellation) is a technology that combines two types of ANC systems: feedforward (an external microphone captures ambient noise) and feedback (an internal microphone measures sound inside the ear cup). This results in more precise and effective noise reduction of up to 45 dB, as both external and internal noise are eliminated. The outcome is cleaner sound and better isolation, especially in changing environments.
